

# Connecting to the "ManhattanTech" Wi-Fi

## Instructions

Automatically connecting your computer or smartphone to the "ManhattanTech" Wi-Fi is easy. Follow the simple instructions below to set up your access.

For Windows devices, click the Wi-Fi logo in the bottom right-hand corner of your screen and proceed to the steps below.

For Mac devices, click on the Wi-Fi logo in the top right-hand corner of your screen and then follow the steps below.

For smartphones, click on settings, and then click Wi-Fi (iOS) or Network & Internet (Android) and locate the available networks section on your device, then proceed below.

1. Select ManhattanTech from the list of wireless networks provided.
2. Check "Connect Automatically" to have your device rejoin the network
3. A webpage should pop-up with the Terms of Service
4. Read the Terms of Service and hit "Accept" to continue
5. Your device is now connected!

Your device will automatically be configured for "ManhattanTech" wireless access. If you did not get a prompt to agree to the Terms of Service, open a web browser on your device (Edge, Chrome, Safari, etc.) and you should be redirected to the page. You can also try "Forget this network" and repeating the above steps. If you are still unable to connect, please contact IT support by submitting a ticket through this link: [Creating an IT Support Ticket](#)
